OCEAN ZONES ANIMAL MATCH UP

Light from the sun filters down into the ocean in layers. Each layer gets darker, colder, and exerts more pressure. Each is filled with sea creatures and plant life specially adapted to live at those depths. Match the organism to the correct ocean zone by drawing a line from the picture to the zone.

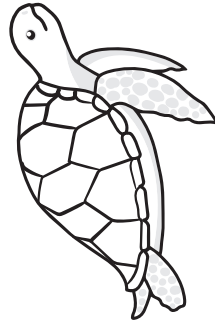

Barracuda

Sea cucumber

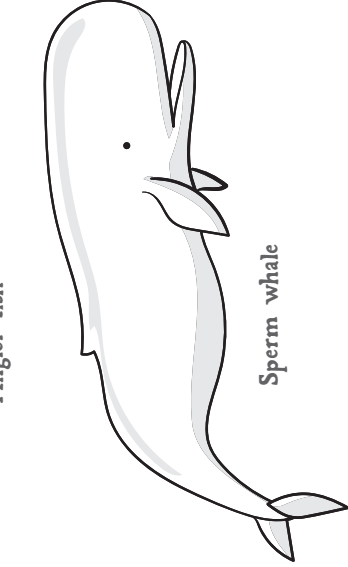

Dolphin

Green sea turtle

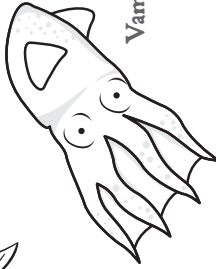

Angler fish

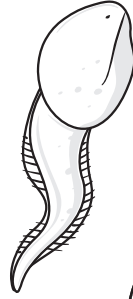

Sperm whale

Brittle sea star

Vampire squid

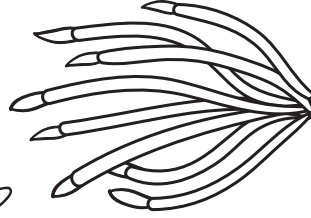

Pelican eel

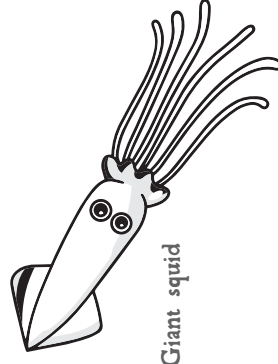

Jellyfish

Greenland shark

Giant tube worms

Giant squid

Clown fish

Bivalves
