

Diver Mask & Snorkel

Color and cut out your mask, snorkel, and straps. Attach the mouthpiece (A) to the snorkel tube (B). Attach one strap to each side of the mask. Overlap the loose ends to form a circle and measure on your head.

Secure the ends. While wearing the mask, adjust the snorkel over your mouth, then attach the tube to the side of the mask.

Optional: Cut out the window of the mask and add a sheet of clear plastic, cling wrap, or other material.

Straps - Cut to edge and attach to each side of the mask
